Applicant's election without traverse of the species of Fig's. 2-4 is acknowledged. Claims 8-9 are withdrawn from further consideration by the examiner, 37 C.F.R. § 1.142(b), as being drawn to non-elected species, not all claims depending upon or otherwise including the limitations of an allowed generic claim.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. § 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is a double inclusion in claim 1 that the "supporter" is a surface of the inner ring already previously claimed. Also in claim 2 recitation "or a supporter formed on the inner periphery of the of said outer ring" contradicts the inner ring supporter in claim 1. In claim 4, "rollers" is not consistent with disclosed balls.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3682

A person shall be entitled to a patent unless --

(a) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, (and claims 4 and 7 to the extent definite), are rejected under 35 U.S.C. § 102(a), as being anticipated by Dickinson. The examiner finds all claimed subject matter to be present.

See Fig. 2.
